SUMMARY

Master's student in Product Development at Chalmers with a Bachelor's in Automation and Mechatronics. Passionate about creating sustainable solutions by combining technical expertise with CAD and additive manufacturing. Apply strong problem-solving skills to thrive in challenging environments and contribute new perspectives to future engineering solutions.

EDUCATION

Chalmers University of Technology

Gothenburg, Sweden

M.Sc. in Product Development

2025 - Present

- **Focus:** Transforms technical ideas into market-ready products, specializing in concept development, product planning, and sustainable design.
- **Key Areas:** Explores how modern production technology and advanced design methodology, specifically additive manufacturing and CAD, can optimize future product solutions.

Chalmers University of Technology

Gothenburg, Sweden

Bachelor's Degree in Automation and Mechatronics

2022 - 2025

- Built a solid foundation in mathematics, programming, mechanics, electrical circuits, solid mechanics, control systems, signals and systems, and machine learning.
- Developed strong skills in technical problem-solving and analytical thinking.

EXPERIENCE

Stadium Outlet

Gothenburg & Uddevalla, Sweden

Part-time Sales Assistant

Mar 2021 - Present

- Manage daily floor operations, logistics, and customer service standards during heavy foot traffic.
- Leverage deep product knowledge to execute targeted customer needs analyses and enhance team collaboration.

Arctic Paper AB

Munkedal, Sweden

Seasonal Industrial Worker

Jun - Aug 2019 - 2026

- Executed large-scale paper production and monitored complex processes during intensive 12-hour shifts.
- Managed machine settings, executed material planning, regulated fluid levels, and safely operated overhead cranes.

ACADEMIC PROJECTS

Volvo Energy: BESS Exterior Design | *Fusion, Financial Modeling, Concept Design*

Nov 2025 - May 2026

- Developed 3D CAD models and realistic renders for three distinct exterior concepts, designed to integrate Battery Energy Storage Systems (BESS) into public environments.
- Spearheaded the commercial assessment and financial analysis, building a base-case model and sensitivity analysis that projected a positive NPV of 224 MSEK for the redesign.
- Collaborated in a 5-person team to systematically evaluate the design space using Morphological and Pugh matrices, successfully balancing strict industrial safety standards with Volvo's aesthetic brand identity.

Bachelor Thesis: Eco-Foil Design | *Granta EduPack, Structural Mechanics, LCA*

Jan 2025 - May 2025

- Collaborated in a 5-person team to develop a sustainable hydrofoil for the Chalmers Formula Sailing Team.
- Evaluated material candidates using Granta EduPack and contributed to a simplified Life Cycle Analysis (LCA), helping achieve an estimated 68.4% reduction in CO2e emissions.
- Calculated structural bending moments and safety factors by hand to verify the hybrid steel and ash wood foil could withstand the required 80 kg static load test.

SKILLS & LICENSES

Programming: Python, Basic knowledge in C++, PLC, MatLab & Arduino.

Software/Tools: CAD (Catia, Fusion, Alias), Vred, 3D-printing (Ultimaker-Cura, Prusa), Git, GitHub, LaTeX, Excel, Visual Studio, Jupyter Notebook, Granta EduPack.

Languages: Swedish (Native), English (Fluent).

Licenses: B Driver's License, Forklift License (A2, A3, A4, B1, B2), Overhead Crane and Jib Crane License.
